I played this game with my girlfriend just to play some cheap horror game and honestly.. it wasn't good. I was hoping there would be anything scary in it. There was one jump scare in it and it was a butt on the wall. We beat the game in around an hour. It says i have 20 hours played but i left the game on over night and didn't know. I'd buy this game when it's on sale (which i did) but wouldn't recommend with full price. I promise. Not worth anything more than maybe 2-3\$\$. A decent horror-themed adventure game. It's mainly centered around exploring, reading notes and finding keys (or powering on systems) to open doors. It had a pretty good atmosphere to it and the story was alright - however, the texts should have been corrected (or completely rewritten) as they included a lot of errors, which lowered the overall quality of the experience a fair bit. There were also some minor bugs, but nothing that hindered the gameplay. In the end, I quite enjoyed it, but it could have been a much better game with more work put into it. I don't think I'd recommend getting it at full price, but on a sale? Sure.. I played this game with my girlfriend just to play some cheap horror game and honestly.. it wasn't good. [Movement is sluggish, bulky. Even when using the left shift to sprint, there's very little noticeable movement change. Likewise, there's some bug errors having to do with the mouse, and opening multiple menus.](https://youtu.be/VOTXxtEmo-g)

[If examining an item, one can open the map or the quit to main screen menu, and this seems to confuse and bug out the cursor. The game itself is very slow on the pickup and thirty minutes in, left me wondering if I would be slowly, sluggishly, finding my way out of this odd survivor horror style game.](https://youtu.be/VOTXxtEmo-g)

[Not sure it quite knows what it wants to be either.. After one hour of playing, can say nice, good atmosphere and story look like good :\)](https://youtu.be/VOTXxtEmo-g)

There is a lot left to be desired with this game.
